

## Grind Floors Faster and Easier

The CDCLarue™ HUM-B™ Surface Grinder is revolutionizing the surface preparation industry. Our ergonomically designed surface grinder will cover more square feet in less time with less effort, resulting in maximized comfort and increased productivity.

Eliminate fatigue and gain better control by standing upright to grind.

Equipped with the patented *Dust Grabber™* shroud, providing 99.9% dust free performance with no suction lock.

Portable, lightweight and mobile.

Comes with your choice, either a single or variable speed grinder, and a 12 segment diamond grinding wheel.

Five inch non-marking swivel caster wheels move effortlessly across the floor.

150-watt halogen light.

The first 110-Volt surface grinder with gas filled shocks, insuring level grinding at all times.

The HUM-B™ is ideal for grinding concrete, terrazzo, stone and masonry, removing paint, adhesives and epoxy floor coatings. Whatever the application, the HUM-B™ makes it easy and increases productivity.

Grinder control at your fingertips

Hand grips for maximum control

Powerful 150-watt halogen light

Heavy-duty on/off switch

Two inch vacuum inlet for dust free operation

Gas filled shocks to ensure total control and level grinding

Forged from 16 gauge steel tubing, the HUM-B is lightweight, tough and easy to control

Equipped with a 12-segment diamond cup wheel and the Dust Grabber dust shroud

Powerful 6,000-rpm seven inch angle grinder

Five inch swivel caster wheels roll effortlessly across work surfaces

The **HUM-B™** is the only surface grinder equipped with our patented *Dust Grabber™* shroud. Made of steel and fitted with a replaceable polymer seal, our design creates a vortex of moving air under and around the circumference of the shroud. This feature allows the grinder to float effortlessly across the floor. Standard shrouds only attempt to seal, therefore creating suction lock, when the seal is broken dust is allowed to escape. Not so with our shroud, it allows air to continually flow around the seal all the time preventing suction lock. Also, another great feature of the *Dust Grabber™* is keeping media from escaping when grinding over uneven surfaces; keeping dust and debris out of the air makes for a safer and more productive work area. *Call us today for more information!*
